HEARTY GREETINGS for Christmas and the New Year

ANOTHER GOOD SEASON CLOSES

Another very successful season on the gridiron has been closed. In the fall of 1921 Arapahoe High set its goal high and we are fast working toward it. The 1921 season closed with a total of 164 points to the opponents 64. Losing only two games. Having met with such unexpected success, Coach Rouse arranged a heavy schedule for the coming season with the idea of giving the men the experience of meeting older and more experienced teams. But again the boys had a surprise for all grid fans in the southwest and the state at large. The ball

to 12 tie and continued by defeating all other towns played in the southwest.

Possibly the greatest victory of the year was the game in which we came out on the short end of the score. In this game we held to one touchdown a team that defeated last year's state champs by a decisive margin. So as we look back over the past two years with a total of 17 games played, only four of which we were forced to take the short end and a total of 290 counters to our opponents 117, we can be justly proud of our boys in blue. The year's record of nine games played and only two lost has been achieved by a squad of about twenty-five husky "mole-skinners." Of this group we are to lose six by graduation.

Smith, end, who is a 2 letter man will go. Smithy has played a fast game for Arapahoe in the past two years, being exceptionally good on offensive and forward passes.

Stub Carter, guard, will be missed as much if not more than any of those graduating. In the seventeen games, Stub has done his share and then some, missing only the last game last year, due to injuries. We can say without fall that they never got through Stub and when a hole was wanted he made it even though an all-state guard and as many other us showed up.

An equally big hole will be made on the other side of Center by the exit of Layman, one of the best defensive men in the state. Layman was more than dependable—he was a stone wall. Then a big hole is going to be left by Richards. Frankie is a whirlwind

DOMESTIC SCIENCE

The Domestic Science girls served a breakfast on Friday, December 9th, under the supervision of Miss Johnson.

Miss Bergland and Mr. Rouse were the guests of honor.

The color scheme of yellow and white was carried out in the decorations which consisted of a table bouquet of Lilly-of-the-Valley and yellow daisies, yellow candles and place cards lettered in gold.

Marjorie Taylor and Bernadine Haine acted as hostesses. Verna Moore and Margaret Aronson were the waitresses. The following menu was served:

- Cream of Wheat with
- Eggs a la Golden Rod
- Cocoa

We, the guests, can certainly say truthfully that it was a grand success and we enjoyed eating breakfast at 4 o'clock in the afternoon but that isn't saying that we were slumbering up to that time.

on the defensive and has stopped many a fast back before he got started. A place that will be possibly the hardest to fill will be the one left by George Carter, who has piloted the team thru every game save one. George is an exceptionally good field runner and a stone wall on the defense.

Blazier, our second team center, did more than anyone will know to develop the team and could be depended upon each night at practice.

Next year's schedule is to cap the climax. It will include the strongest teams in the west. Cambridge, Goldenburg, Curtis Aggies, Holdrege and McCook will be some of the hard-fought which we will have to clear next year. With Mat's toe, Rudy's end runs, One-Williams line plunging, Burden's defensive work, the backfield will be their share. Baxter and supported by the other number of aspirants for the other wing including Utterback and Eagle-son, who will show up strong, will do their part. With Al Benjamin back by the pivot, flanked by Randolph, Zike, LaBounty, Baxter and Michel, along with the support of a loyal bunch of second stringers. We are going to give that State Penant an awful chase.

RADIO COLUMN

Such a widespread interest has been taken in Radio telephony that we have decided to print a Radio column in this paper for the benefit of those interested in it.

To anyone not initiated into it's mysteries, Radio presents a formidable array of complex terms, definitions, etc., which in many cases discourage those who might have become interested. For practical use however a person needs never to bother with these names. A radio set is as easy to operate as a phonograph when one has had it a short time.

A good radio set does not cost any more than a phonograph and you are not confined to one station. Changing the position of a dial or two a different station may be brought in. Music to the listeners taste or possibly a speech on nearly any subject may be "tuned in."

The owner of a radio set, when someone mentions a famous singer or some orchestra or band that they had heard in the city, can say that he had heard a program which they were at the same evening. Many people are asking the question "How can the owners of broadcasting stations afford to keep them up when owners of receiving sets are paying nothing for this service. At present the idea of most broadcasting stations is the advertisement for instance station WBAP, the Fort Worth Star Telegram, WIB, The Sweeney Automobile School, Kansas City, WOV, Palmer School of Chiropractic, Davenport, Iowa, and KLZ, Reynolds Radio Company, Denver. Sooner or later these stations will cease free broadcasting and sets will be made and set at a definite wavelength and rented out. A Broadcasting station will then be set to a wavelength corresponding to those of the rented out sets and music, etc., will be sent out. The price of rents on the sets paying for the entertainments and putting a profit into the hands of the owners.

In Latin Class

A Freshie: "Please, Miss Knight, will you decline the other man."
The Teacher: "I wouldn't decline any man."

ABOUT OUR NEW SCHOOLHOUSE

On account of the crowded condition in the present school, we are all glad to see the new building under way.

Our new schoolhouse will have two stories. The lower story is set into the ground a few feet and will have its windows on an approximate level with the top of the ground.

The main feature of the first floor is the gymnasium. It is twenty feet high and affords a playing space of forty by sixty feet. The bleachers are built in and will accommodate two hundred people at the east end of the stage. This feature was added to make the gym available for community meetings. West of the gym are the girl's lockers and showers and to the east are the boy's lockers and showers.

Besides the gymnasium and locker rooms the first floor contains four class rooms, the superintendent's office and the furnace rooms.

The main feature of the second story is the assembly room. This room is forty by sixty feet and is estimated to seat two hundred and twenty-five persons.

The first floor will also contain a reference library and text book room, four class rooms, a complete physics and chemistry laboratory and a complete Domestic Science room which includes a model dining room and a work room. The principal's office is also located on this floor. Individual lockers are provided for all pupils and teachers.

The building is made of brick with massive Bedford stone trimmings.

The contractor is Geo. R. Alcorn of Omaha, the Architect is R. A. Bradley & Co., of Scotsbluff and the consulting engineer is J. N. Snyder of Arapahoe.

The building and equipment is the last word in modern and scientific construction.

This building will be ready for occupation by the beginning of the next school year.

Miss Benjamin: "Tonight Verne you must play the part of this Duke."

Verne: "Then you must give me 20 cents for share."

Miss Benjamin: "On a second that you will play the part of a Bolshevik."

CLASS REPORTERS

Freshman—Ted Ross, Florence McCray
Sophomores—Bernadine Haine, Omar Snyder.
Juniors—Doran Bellamy, Helen Riepe
Seniors—Belle Harmon.
Specials—Guy Haine.

LIFE OF A CLASS REPORTER

When the Arapahoe High School decided to have a high school paper much interest was shown in the campaign for the election of officers and reporters. The various classes held meetings for the purpose of determining which of its members should have the "great honor" of being class reporters. The individuals thus honored felt themselves not a little "exalted" until the time drew near for the material of the first edition to be in.

Questions of this nature arose. How will I write it? Will this be alright? What happened in our class?

The first edition came out. Every word was closely scrutinized and words of approval or disapproval were exchanged. Successive editions were subjected likewise to severe criticism. During this time the "honored" reporters had changed their opinions of the great honor bestowed upon them. For, if they put in jokes of the class, they are not serious enough to write anything else; if they don't put in jokes they have lost their sense of humor. If they write up some witty saying about someone they lose a friend or are trying to get even for something.

An enormous amount of class notes are expected for each issue when nothing has happened in the class and even an extensive imagination finds itself at a loss to help the owner out of this difficulty.

Now, fellow students, we, the reporters of the A. H. S. Arrow are appealing to you for help. Lets all pull together and combine our efforts in an attempt to edit a paper that will be worthy of our High School.

LOYALTY!

Be loyal!
Have you as a student of the high school ever thought of again what it should mean to you?

In the first place be loyal to yourself; your classmates; the school and the faculty.

"This above all, to thine own self be true,

And it will as the day the night;
Thou can't not then be false to any man.

—Shakespeare
Be loyal to your fellow students.

When some of their number are representing your high school in some

activity; back them up, let them feel that you appreciate their endeavor to carry off honors. If however, they fail to do so, don't discourage them, that is disheartening. Cheer them up! Urge them on! Tell them to try again, not to give up.

Again if you find one of your classmates or fellow students in a difficulty, be it his school studies or otherwise, don't be stingy with your help and advice. Do your level best to put him on his feet again. Help him square himself with the world. Some day your efforts will be repaid!

That is loyalty to your fellow students.

Be loyal to your school, show the people of the town that we are

worth while school, that you are intensely interested in it because you are getting something that will help make you better citizens of this wonderful country of ours.

The citizens of Arapahoe are interested in your welfare, as they have shown by the plans of the splendid new building. Let them know that you appreciate it and that you are taking advantage of the opportunity they have offered.

Be loyal to your teachers!

They, above all others, have the most kindly interest in you and desire that you have the best that they can give you; therefore they deserve your cooperation and your loyalty. Put forth your earnest efforts to excel in your course of studies, thereby setting an example for others and benefiting yourself.

In voicing their opinion, a number of pupils in the high school, say the A. H. S. Arrow is too full of advertising and not enough educational or "peppy" material. These are the few people that are always "knocking" the Arrow but are never willing to contribute or help it out in any way.

SENIOR NOTES

Everyone is certainly glad to see Mr. Rouse back to school again. This was clearly manifested by the yells and hurrahs which arose in the assembly when he entered.

The Physics class has completed the study of Electricity up to "Induced Currents." They are now taking up the study of "The Fundamental Units of Measurement," which they find a little more difficult but hope will prove to be as interesting as Electricity.

A professor of Physics at the Massachusetts Institute of Technology has weighed the earth and found it to top the scales, at 6,000,000,000,000,000,000 tons. We can all be thankful we're on top.

We, the members of the Senior class wish to thank our "superior" the Sophomores for their compliment in the last issue of the Arrow. We may be young but we have a friend in need a friend indeed." You may need us before Spring.

The Seniors have the reputation of having class meetings most every night in the week but that just shows what an important class it is. At the present we are having to decide on a suitable name for the annual, for we want to name that will adequately express its contents.

What makes the Seniors all look so happy. Class rings coming soon.

HOME ECONOMICS IN THE SCHOOL

Sometimes the question arises as to whether or not Home Economics should be taught in the Public Schools. The following are a few of the reasons why it should be taught. Girls attending University will have the opportunity of taking a special course in this sort of work and although the less fortunate ones are deprived of this privilege, if Home Economics are taught in the school they will have as much chance of becoming good housewives as the others. Sewing enables her to make her own clothes at less expense. It gives her an idea of the type of clothes that are best suited to her. Viewing from the social standpoint it gives her an idea of the people in life who are manufacturing clothing and it tends to broaden the sympathies when she understands the condition of laborers. For example, when she knows the condition of the laborers in Hat factories where the laborers can only work for three months at a time until a disease is contracted which throws them out of employment for periods of months.

her more discerning as to the kind of article which she is going to demand from the public. The girls also get an idea of the conditions under which ready made clothing is made in our "Sweat-Shops" in the east. The girl also learns the different fabrics and the way in which they are manufactured.

Cooking gives the girl (1) confidence and teaches her to combine different materials in such a way as to make attractive and appetizing dishes. (2) It teaches her how to plan economically. (3) Meal service. (4) It teaches different foods that are valuable and the menus that are healthful.

The course given in cooking is begun by doing some canning. Then the different meals are studied, taking first the things which are served at breakfasts, then luncheon etc. Next the study of etiquette and meal service is taken up. At each meal two girls act as hostesses and two as waitresses. A model kitchen is also planned throughout the course of the year. The purpose of Home Economics is to make the girls better fitted to function in home life. The crying need of America today is a better home life.

JUNIOR NOTES

Arapahoe was well represented at the State Championship football game at Kearney, Dec. 8, both by the business men and the high school. Almost all the football boys attended. Although a cold ride, they all considered the game worth going to see.

Last Tuesday the English IV class was very much alarmed when Miss

Berglund appeared with some test paper. Of course, all of us thought there was going to be a test. But then we were informed that we would have a spelling lesson. Now you will never expect to find a misspelled word on English IV papers.

The Algebra III class is making good progress in their work. They are now studying indeterminate equations. Soon they will start on Logarithms. This being the last subject in Algebra III to be studied.

The Normal Training Reviews class in drawing have completed their note books and portfolios and are now making patterns on the basis of the sixteen squares.

The members of the English IV class have completed one book report this semester and are now working on the second one.

The European History class has almost completed the reading and will be ready to start the study of the world war which they all know will be interesting.

The manual training boys are showing good progress toward the making far with their work that they can finish this semester.

The Latin class is studying Caesar's wars with the world war and also are comparing the names of the divisions and weapons used by Caesar in the world war. Mr. McCrory has given the class some facts about the weapons and guns used in the last war.

Some of the Normal Training class are anxiously awaiting the arrival of state examination grades. We said some, not all, for due to the fact that the examinations were given during Thanksgiving vacation several forgot there ever was such a thing as "exams."

The person who stands on the street corner looking around for something to gossip about or to find fault with can always find what he is looking for. But what a life he lives. His soul shrivels and withers until it is shown in his manner and looks. For such a person life has lost its savor. It becomes sour, misanthropic, whiney. He passes from bad to worse and sees no good in anybody or anything. His taxes are too high, no matter how low they may be, and he curses his neighbor because his neighbor is prosperous and enjoys life. In fact he hates himself, is a menace to a town's prosperity, a foe to God and no good to the devil. These persons seem to be a necessary evil in every town and the great question is what to do with them, or how to cure their baffling disease that is such an impediment to the march of progress.

Cattle stray in queer places. We once saw a cowhide in a shoemakers shop.—Ex.

If you would like a practical demonstration of the new Radio receiver, which runs from a telephone dry cell call Ralph Cox at the Mirror office.

Advice
Catch 'em young,
Treat 'em rough,
Down the flunks,
That's the stuff.

Miss Berglund took charge of the Professional Training Class last Friday while Mr. Bowers went to see the football game at Kearney.

BIG TRIAL IN OUR CIVICS CLASS

On November 21st, a robbery was committed in Civics Class. A complaint was filed by Guy T. Haines against Allen Chambers for the stealing of a 3/4 K diamond ring and a watch, the total value being \$215.

A warrant of arrest was issued by Justice of the Peace Bowers to Sheriff Zike, who arrested Mr. Chambers. A search warrant was also issued to the Sheriff who searched him and his desk and found the stolen property. The preliminary examination was held then the case was bound over to the District Court. Mr. Chambers being released on bail of \$10,000. Clifford B. and Lawrence L. went his bail. Subpoenas were issued to Hayde Crowell and Albert Benjamin for the prosecution and Clifford Blazier, Fern Dutton, Lawrence Layman, Iva ten-Bensil, and Elmer Richards for the defense. As a result of empanelling the jury, the jurymen were as follows: Mary Thomas, Bessie Harmon, Vern Smith, Marjorie Blackman, Clarence Thomas and Erna McCoy.

Mr. Chambers pleaded not guilty. The attorneys Leroy Carter, acting for the defendant, and George Carter, acting for the plaintiff stated the case to the jury.

Following this the several witnesses were called upon the witness stand and after taking the oath were questioned by both attorneys as to what they knew about the case.

Then the jurymen were dismissed from the court room by court bailiff, Mr. Lewis, while a fierce debate took place between the two attorneys.

The jury was recalled and the attorneys proceeded to put their arguments before them.

At the time of this writing they have not completed their arguments, so the verdict of the jury will be announced later.

In Civics

George: "I want to propose to this jury."

Mr. Bowers: "You'd better wait until June."

Gwendolyn: "Why it's only six o'clock. I told you to come up after supper."

Roland: "That's what I came for."

No, this isn't a joke, it actually happened:

"Once more he cudged the sides of the inflexible Gunpowder, and, shutting his eyes, broke forth with involuntary fervor into a psalm tune."

—Legend of Sleepy Hollow

A Freshmen's Version:

"Once more he took a holt of his Gunpowdered weapons and shut his eyes, he was trying to decide what he wanted to do and then hummed a song."

While Skating

Minnie Falling(): "O, dear!"

Edwin: "Here I am."

The Seniors have named the annual "Tomahawk" and are dedicating it to Mr. Bowers.

Claude (affectionately)—"Melba, I've had something hesitating on my lips for some time and now—"

Melba (interrupting)—"O Claude! how I do hate those little mustaches."

1st Prize for Politeness

The Fellow who is so polite that he tips his hat when he says good-bye to his girl over the telephone.

OPERETTA

The High School Operetta, "In Old Louisiana" is to be given in the near future. Watch for the date. It will be a real treat. If you enjoyed the Operetta "Miss Cheryblossom" given last year, you cannot afford to miss this one.

Did You Ever Hear this One?

Miss Knight: "If you don't stop talking I'll take your name?"

Muriel K.: "I don't care if you do. I have another promised me."

Want Ad—A correspondence course in reading. K. K.

Mr. Hamm and his Geometry class agree on a few "subjects" such as Willard B. but they are few and far between.
